COMPUTEX forums creating business opportunities with Cloud Computing

for Chinese Version

COMPUTEX TAIPEI 2010, the largest ICT industry B2B procurement platform in Asia and second largest in the world is held on June 1st - 5th in Taipei. According to the Taipei Computer Association (TCA), an organizer of COMPUTEX TAIPEI, numerous COMPUTEX technology forums will discuss the latest application trends in recent years. Among the industry heavyweights invited to the events are Intel, Microsoft, Google, ARM, Quanta, IBM, Industrial Technology Research Institute etc. that will share their perspectives on Cloud Computing, mobile computing, instant sharing, open system, medical care and various other ICT trends. The goal is to give guests and overseas buyers more complete and thorough speeches that further the knowledge on these industry trends.

Cloud Computing in spotlight with Intel, Microsoft & Google all joining in  
It is fair to say that Cloud Computing is a major topic at this year's COMPUTEX forum. Not only is it a quintessential technology trend for Intel's e21FORUM2010, but also the Microsoft Forum 2010 and the 2010 Cloud Computing Forum at which Google is the main speaker. These forums will analyze the possible impacts, business opportunities and future prospects of Cloud Computing on mobile computing, information-to-go and everyday applications etc. from the viewpoints of software, hardware and internet service.
